Lara Michelle Beautiful Interiors

Vibrant colors, warm wood tones and rich textures make up this inviting family room cleverly designed by Rye Brook interior designer, Lara Michelle Feinsod and constructed by Gold Crown Construction. Creating stunning residential interiors throughout the Metro New York area, Lara has built a reputation on being able to address each client's unique design challenges, then solving those challenges both effectively and beautifully. For this project, "it was important to her clients that the space be modern, with lots of comfortable, durable seating for their busy, young family," stated interior designer, Lara Michelle. "The underlying theme for this room is based in nature", she added. A wavy line pattern in the cut

velvet sofa fabric becomes a theme that's echoed again on the custom Kravet carpet and hand scraped doors of the wall unit. All furnishings were custom made for the space with the exception of a petrified wood end table. The fireplace wall has been plastered in rough edge marble, a design element we see again repeated in the rough edges of the coffee table.

To temper the natural light flooding this double height space, Lara had semitransparent woven vinyl roller shades installed. Though they allow some light to filter through, they help prevent sun glare from distorting the pictures on the two fifty-five inch television screens. Neutral walls provide the perfect backdrop for artwork by Lalani Nan, entitled; "Acceleration".

(Available through Kenise Barnes Fine Art.) Thomas Bigatel's; "Reformation II" adds movement and saturated color atop the organic canvas of the textured fireplace wall.

Here, as in nature, color, texture and light come together to set the perfect stage for this family to relax and enjoy their time together.
